SINGAPORE INTERNATIONAL WATER WEEK

THE GLOBAL PLATFORM TO SHARE AND CO-CREATE INNOVATIVE WATER SOLUTIONS

10–14 JULY 2016
SANDS EXPO & CONVENTION CENTER, MARINA BAY SANDS, SINGAPORE
SINGAPORE INTERNATIONAL WATER WEEK: THE PREMIER GLOBAL PLATFORM FOR WATER SOLUTIONS

A leading event on the global water calendar, Singapore International Water Week (SIWW) is an international platform to share and co-create innovative water solutions. The Water Leaders Summit, Water Convention, Water Expo, Business Forums, Industrial Water Solutions Forum, TechXchange, Hydro-gen and the prestigious Lee Kuan Yew Water Prize continue to provide participants abundant opportunities to network, exchange insights and co-create innovative water solutions for the common goal of a sustainable tomorrow.

From 1 to 5 June 2014, the Singapore International Water Week (SIWW) saw the largest gathering of more than 20,000 participants from 133 countries/regions, spanning the government, international organisations, industry and academia sectors. It serves as a platform for participants to network and forge partnerships.

The event achieved a record high of $14.5 billion in the total value of announcements, underscoring Singapore’s stature as a leading global hydrohub. It also presented many opportunities to connect with the leaders in the water industry, discover cutting-edge technology and partake in intensive water dialogues.

EXCHANGE INSIGHTS WITH GLOBAL WATER THOUGHT LEADERS

Creating solutions for a sustainable future

Over 500 global water leaders gathered to discuss and co-create forward-looking solutions for urban, environmental and water issues at the Water Leaders Summit.

A major challenge facing humanity today is how to guarantee safe drinking water and environmental sanitation for everyone in the planet. Innovative solutions through appropriate technology bring hope that this challenge will be met in the near future.

Dr Benedito Braga, President, World Water Council

Water and energy are among the world’s pre-eminent development challenges. We need to coordinate political governance, adopt coherent and integrated policies and develop innovative strategies to tackle these issues.

Michel Jarraud, Chair of UN-Water

By 2040, 40% of the population will be living in an area with water stress or water shortage. We’ll need the co-operation between the private and public sectors because technology is going to be a key element of the solution.

Jean-Louis Chaussade, Chief Executive Officer, Suez Environment Company

Water experts, practitioners and academia gathered to share technical expertise at the Water Convention, which has established itself as the go-to conference for practical water solutions. Water Convention 2014 saw 1,320 delegates and a total of 348 oral and poster presentations.

I learned what other scientists are doing in my research field by attending their presentations and found the feedback from world-class experts very helpful for my future research. I was also given the opportunity to express my hopes of future collaborations with them.

Zhang Wang Xie, Winner of Water Convention 2014 Best Poster, Polysaccharide Fouling in Forward Osmosis: Polysaccharide Absorption and Accumulation on the Membrane
DISCOVER BUSINESS & COMMERCIAL OPPORTUNITIES

Where project announcements and market trends take centre stage

**Business Forums** 2014 saw new thematic tracks covering Desalination & Water Reuse, Public-Private Partnerships and Industrial Parks in addition to the regional ones like India, Middle East & North Africa, Southeast Asia and China.

Billion-dollar projects were announced during the Business Forums. Saline Water Conversion Corporation (SWCC) announced the construction of the world’s largest reverse osmosis plant in Rabigh, Saudi Arabia, valued at $2.7 billion. Municipalities in Indonesia, Laos, Philippines and Vietnam also shared over $1 billion worth of investment projects for prospective solution providers.

Focused on technology innovation and commercialisation, the one-day **TechXchange** forum brought together 230 innovators, international water stakeholders and investors. Innovation Pavilion provided opportunities for early stage water-tech companies to network with potential investors and partners.

Attendees at the **Industrial Water Solutions Forum (IWSF)** gained insights on investment opportunities and challenges related to water for industrial sectors. Recognising the need to increase water efficiency, speakers from Coke, Nestlé and L’Oréal were present to share their experiences and best practices on industrial water management. Industrial Water has gained a global spotlight, and can be seen in new tracks across SIWW like the Water Convention Parallel Track “Water for Industries” and the Industrial Park Business Forum.

“I thoroughly enjoyed the day. It had variety and outstanding speakers from the venture capital community, was well organised and included an excellent balance of information and inspiration.”

Neil Palmer, Chief Executive Officer, National Centre of Excellence in Desalination, Australia

“It has been a great conference and the pavilion was amazing! I found the collection of water industry leaders and entrepreneurs especially impressive, and I had some great conversations.”

Mark Owen, CEO, Puralytics, USA
THE MOST COMPREHENSIVE WATER TRADE SHOW
Showcasing the latest innovations and practical case studies of water technologies across all industries

Water Expo 2014 occupied two levels and 23,000 sqm of exhibition space at the Sands Expo & Convention Center.

More than 800 participating companies at Water Expo 2014

24 Group Pavilions

98% of trade visitors achieved their business objectives

94% of exhibitors met their objectives

For us, it’s a tremendous opportunity to network with all the participants that come from around the world and a great meeting space for clients, contacts and others. It just connects everybody.

Peter Nicol, Senior Vice President, CH2M HILL

Complementing the Water Expo in the digital arena, Virtual Water Expo provided trade visitors with round-the-clock access to an array of products for their water needs before and during the actual Water Expo.

Connect@SIWW, the exclusive business matching concierge, set up an on-site booth at the Water Expo to facilitate the scheduling of meetings among delegates and exhibitors.

Be sure to reserve your space or customise the suitable sponsorship package for your business needs for Water Expo 2016.

THE INAUGURAL YOUNG WATER LEADERS SUMMIT (YWLS)
brought together water leaders of the future, with the aim of
building competencies and transforming them into change agents
in their home country and beyond. It also serves as a platform for
collaborative dialogues, fiery debates, and networking among
young professionals and industry leaders.

Following an intensive nine-week industry-oriented HydroPreneur
programme run by globally-established start-up accelerators like the
Lean LaunchPad and the Founder Institute, the best teams pitched
to an audience of top water companies, angel investors and venture
capitalists at Hydro Pitch Day on 2 June 2014.

The second edition of the Aquarius Programme brought
together 19 senior water leaders from nine countries, ranging from
regional heads to CEOs, to broaden and deepen their capabilities
in order to effectively lead and manage a water business. The
inaugural exclusive half-day Aqua Conversations CEO
Roundtable saw CEOs of water companies converging for
discussions on leadership challenges and experiences in the water
industry. Topics ran the gamut of geopolitical and infrastructure
trends in Asia, to the value of leveraging cultural diversity to enhance
organisational performance.

ORANGE COUNTY WATER DISTRICT was awarded the Lee Kuan
Yew Water Prize 2014 for its exemplary work in groundwater
management and water reclamation using advanced water reuse
technologies, as well as its achievements in public policy and
community outreach.

The Lee Kuan Yew Water Prize 2016 Call for Nominations will
A BIG THANK YOU FOR SUPPORTING SIWW 2014

SEE YOU AGAIN IN 2016, JULY 10–14

ABOUT SINGAPORE INTERNATIONAL WATER WEEK

The Singapore International Water Week (SIWW) is the global platform to share and co-create innovative water solutions. Stakeholders from the global water industry gather at SIWW to share business opportunities and showcase the latest water technologies. SIWW is part of the strategic programme of the Singapore Government to grow the water industry and develop water technologies. The 6th Singapore International Water Week was held in conjunction with the 4th World Cities Summit and the 2nd CleanEnviro Summit Singapore, from 1-5 June 2014 at the Sands Expo & Convention Center, Marina Bay Sands, in Singapore.
